

SOCIOLOGY 101 · WEEK 1 QUIZ

Sociology 101 — Week 1

Name: _____

Date: _____

How to play: Read each question twice, read every choice, cross out the wrong ones, then put an X in the box next to your answer. Get **6 of 8** right to earn the badge.

1. Sociology is the science of...

- ☐ A. how the body's organs and systems work together to keep a single person alive and well.
- ☐ B. the individual mind – what one person thinks, feels, remembers, and decides to do.
- ☐ C. people in groups – how they organize, the roles they take, and the rules they follow.
- ☐ D. money – how people, businesses, and countries earn it, save it, and spend it.

2. Who spends the most hours at a NICU baby's bedside?

- ☐ A. The NICU nurse
- ☐ B. The neonatologist
- ☐ C. The social worker
- ☐ D. The respiratory therapist

3. Which team member designs each baby's daily TPN recipe and double-checks every medicine dose?

- ☐ A. The chaplain
- ☐ B. The pharmacist
- ☐ C. The lactation consultant
- ☐ D. The unit clerk

4. Why is the cleaning staff part of the NICU care team?

- ☐ A. They are responsible for setting the alarm limits on every monitor at the start of each shift.
- ☐ B. Cleaning surfaces and equipment is infection control, and germs are a top danger to preemies.
- ☐ C. They keep the parents company and bring them meals during the long night shifts on the unit.
- ☐ D. They are the team members who weigh each baby every night and record the weights on the chart.

5. A baby needs an operation to repair a complex heart defect. Which level of newborn unit is designed for that?

- ☐ A. Level III (NICU)
- ☐ B. Level IV
- ☐ C. Level II (special care nursery)
- ☐ D. Level I (well-baby nursery)

6. What does “regionalization” of newborn care mean?

- ☐ A. Organizing hospitals so the sickest babies are born in, or moved to, the ones equipped for them.
- ☐ B. Making sure every region of the country has exactly the same number of incubators and nurses.
- ☐ C. Dividing a large NICU into separate regions, or pods, according to the babies' last names.
- ☐ D. Sending every newborn back to its own local hospital as soon as possible after it is born.

7. Rounds happen every morning in the same order, with the same roles and the same shared language. Why does that matter?

- ☐ A. A shared routine means nothing gets skipped and everyone knows when it's their turn to speak.
- ☐ B. It lets the attending physician finish faster and leave the unit for the day.
- ☐ C. It is required so that all the babies can sleep at the same time each morning.
- ☐ D. It keeps parents from asking questions while the doctors are talking.

8. What did Dr. Julius Hess and nurse Evelyn Lundeen build in Chicago in the 1920s?

- ☐ A. The first machine that could deliver liquid surfactant directly into a preemie's lungs.
- ☐ B. The first school in the United States devoted to training surgeons who operate on children.
- ☐ C. The first blood pressure cuff small enough to fit around a premature baby's arm or leg.
- ☐ D. One of America's first hospital units for premature babies, run as a doctor-nurse partnership.

Score: _____ / 8

Badge earned? YES / NOT YET (need 6)
