

SOCIOLOGY 101 · WEEK 2 QUIZ

Sociology 101 — Week 2

Name: _____

Date: _____

How to play: Read each question twice, read every choice, cross out the wrong ones, then put an X in the box next to your answer. Get **6 of 8** right to earn the badge.

1. About how many babies are born preterm each year, worldwide?

- ☐ A. About 13 million – roughly one baby in ten.
- ☐ B. About 130,000 – roughly one baby in a thousand.
- ☐ C. About 130 million – nearly every baby born.
- ☐ D. About 1.3 million – roughly one baby in a hundred.

2. Why do sociologists compare places using rates like 'per 1,000' instead of plain counts?

- ☐ A. Rates are always smaller numbers, so they are easier to write down.
- ☐ B. Rates hide the exact number of deaths, which is kinder to families.
- ☐ C. Counting every baby is impossible, so rates are a guess that is close enough.
- ☐ D. Groups are different sizes, so dividing by the group size makes them comparable.

3. Where do more than six in ten of the world's preterm births happen?

- ☐ A. North America and Western Europe.
- ☐ B. East Asia and Australia.
- ☐ C. Sub-Saharan Africa and South Asia.
- ☐ D. South America and the Caribbean.

4. A baby born at 30 weeks in a rich country almost always survives. In the poorest countries about half of such babies die. What is the main reason?

- ☐ A. The diseases in poorer countries are different and have no known treatment.
- ☐ B. Poorer countries have too many babies for the hospitals, so preemies are sent home.
- ☐ C. Lack of basic care – warmth, feeding help, and treatment for infections and breathing trouble.
- ☐ D. Babies in poorer countries are born weaker, so the same care wouldn't help them.

5. In the United States, which group of babies dies in the first year at more than twice the rate of white babies?

- ☐ A. Babies born in cities
- ☐ B. Black babies
- ☐ C. Babies of first-time mothers
- ☐ D. Babies born in winter

6. What is a 'maternity care desert'?

- ☐ A. A county with no hospital or clinic that delivers babies.
- ☐ B. A dry, hot region where more babies are born early.
- ☐ C. A hospital that has run out of incubators for its preemies.
- ☐ D. A NICU that does not allow parents to visit their babies.

7. What does 'social determinants of health' mean?

- ☐ A. The social workers on a NICU team who help families with money, housing, and paperwork.
- ☐ B. The conditions of life – money, housing, food, stress, distance to care – that shape who gets sick.
- ☐ C. The laws a country passes about which hospitals must accept which patients and at what price.
- ☐ D. The genes a baby inherits from its two parents that decide how healthy it will grow up to be.

8. What did Dr. Virginia M. Alexander do in Philadelphia in 1931?

- ☐ A. Founded the March of Dimes to raise money for premature and sick babies all across the country.
- ☐ B. Invented the first incubator for premature babies and displayed it at a fair to raise money for care.
- ☐ C. Became the first Black woman in the United States to earn a medical degree from a university.
- ☐ D. Opened a clinic in her own house so poor Black families could give birth safely, then reported the gap.

Score: _____ / 8
