

STATISTICS 101 · WEEK 2 QUIZ

Statistics 101 — Week 2

Name: _____

Date: _____

How to play: Read each question twice, read every choice, cross out the wrong ones, then put an X in the box next to your answer. Get **6 of 8** right to earn the badge.

1. Five heart rates: 120, 150, 130, 160, 140. What is the median?

☐
☐
☐
☐

- A. 140
- B. 130
- C. 150
- D. 120

2. One baby in a group of nine weighs far more than the others. Why doesn't the median get dragged toward that baby the way the mean does?

☐
☐
☐
☐

- A. The median is only calculated after the biggest and the smallest babies are removed.
- B. The median is just the middle position in line; how big the biggest is doesn't matter.
- C. The median rounds every baby's weight to the nearest hundred grams before comparing.
- D. The median only counts the babies who weigh less than the group's average weight.

3. A baby is at the 10th percentile for weight. What does that mean?

☐
☐
☐
☐

- A. About 10 out of every 100 babies her age weigh the same or less than she does.
- B. She is 10 percent of the way to her expected full-term weight.
- C. She weighs 10 percent less than the average baby her age.
- D. She has gained 10 percent of her birth weight since she was born.

4. The 50th percentile is the same thing as...

☐
☐
☐
☐

- A. the mode.
- B. the median.
- C. the mean.
- D. the range.

5. Ten babies are lined up by weight. Your baby is the 7th smallest. What percentile is that?

- ☐ A. The 30th
- ☐ B. The 7th
- ☐ C. The 70th
- ☐ D. The 17th

6. A baby born at 28 weeks weighs 800 grams – well below the 10th-percentile line for 28-week babies. Doctors would call her...

- ☐ A. large for gestational age, and check her mother's sugar.
- ☐ B. small for gestational age, and look for a reason.
- ☐ C. premature, but a perfectly typical weight for 28 weeks.
- ☐ D. a normal full-term newborn who just needs feeding.

7. A healthy full-term baby has been at the 5th percentile for weight at every checkup since birth. What does that tell you?

- ☐ A. The chart must be wrong, because healthy babies are never that low.
- ☐ B. She is falling off her curve and needs extra calories right away.
- ☐ C. She's a small, healthy baby who is following her own curve – that's fine.
- ☐ D. She has a hidden disease, because the 5th percentile is a failing score.

8. The Fenton preterm growth chart was built from...

- ☐ A. the weights of about four hundred babies in one hospital in Canada.
- ☐ B. ultrasound pictures of ten thousand babies still inside the womb.
- ☐ C. a formula that predicts weight from a baby's length and head size.
- ☐ D. the birth weights of about four million babies from six countries.

Score: _____ / 8
